BOOK NOTE

PROCEEDINGS OF THE SEVENTH COLLOQUIUM ON THE LAW OF OUTER SPACE, 1964, edited by Andrew G. Haley and Mortimer D. Schwartz, University of Oklahoma Research Institute, 1965, pp. 425. \$5.00

The volume contains thirty-six papers and speeches delivered during the Colloquium on the Law of Outer Space by the International Institute of Space Law of the International Astronautical Federation (9-10 September 1964, Warsaw, Poland). Development of the law of outer space is the central theme, branching out into many fields. A sampling of the topics discussed includes the status of celestial bodies in space law, national and international space stations, medical jurisprudence in outer space, liability for damage caused by spacecraft, and recent developments in the law of space. The authors include eminent authorities on air and space law from some thirty countries. Twenty-nine of the papers are printed in English, six in French, and one in Spanish.
