BIBLIOGRAPHY

Foreign Articles

The Journal prints matter it considers worthy. However, publication does not necessarily imply agreement by the editors or the publisher with the opinions expressed in the articles.
Due to the increased interest by our readers in foreign case law, the Journal has instituted a new policy in the Recent Decisions section. Effective with the Winter issue, the section will be broken down into domestic and foreign decisions with emphasis in the foreign segment being placed on Warsaw cases. As an aid to increased coverage, the International Review section has been adapted. In place of detailed presentations on the various aviation and space conventions, the Journal has arranged to present a summary of events on each of the conventions covered, accompanied by the mailing address of the convention's reporter should the reader desire to make further inquiries. These summarizations will adequately cover the area while at the same time freeing additional space which can be devoted to other developments of international import.
