CURRENT LITERATURE ON AVIATION
BOOKS AND PAMPHLETS

Analysis of international air transport problems arising out of the Chicago International Civil Aviation Conference as they relate to Portugal.

Presents estimates of the total air passenger, cargo, and mail traffic that can be expected at Port Authority airports during the thirty year period, 1950-1980. This comprehensive study makes available much new data that will be valuable in the analysis of many transportation problems in addition to its use in the forecasting of future air traffic volumes.
